Silent Gun

The Veer Union

I reside the vacant sides as the sky turns gray
Paralyzed in my disguise I will fade awayNow I hide away from me, I can not fight this diseaseI fell into the cracks in my head that's where I lost it
That's where my world went wrong cause the night I crossed
It I couldn't stop there cause my mind was gone so my sadness
Has turned to madness now know that I have become the silent gunWhat I thought was right turned out the light deep inside of me
Once was alive but can't revive what I use to beNow I hide away from me, I can not fight this diseaseI fell into the cracks in my head that's where I lost it
That's where my world went wrong cause the night I crossed
It I couldn't stop there cause my mind was gone so my sadness
Has turned to madness now know that I have become the silent gunI fell into the cracks in my head that's where I lost it
That's where my world went wrong cause the night I crossed
It I couldn't stop there cause my mind was gone so my sadness
Has turned to madness now know that I have become the silent gun
Facing me, silent gun, facing me, silent gun
