

Silent Gun

The Veer Union

I reside the vacant sides as the sky turns gray
Paralyzed in my disguise I will fade away Now I hide away from me, I can not fight this disease I fell into the
cracks in my head that's where I lost it
That's where my world went wrong cause the night I crossed
It I couldn't stop there cause my mind was gone so my sadness
Has turned to madness now know that I have become the silent gun What I thought was right turned out the light
deep inside of me
Once was alive but can't revive what I use to be Now I hide away from me, I can not fight this disease I fell into
the cracks in my head that's where I lost it
That's where my world went wrong cause the night I crossed
It I couldn't stop there cause my mind was gone so my sadness
Has turned to madness now know that I have become the silent gun I fell into the cracks in my head that's where
I lost it
That's where my world went wrong cause the night I crossed
It I couldn't stop there cause my mind was gone so my sadness
Has turned to madness now know that I have become the silent gun
Facing me, silent gun, facing me, silent gun
