

It Must Be You

[Dolly Parton](#)

(Blaise Tosti) Just like the tide goes with the sea

We belong together, you and me

Just like the dawn followed by day

We'll always be together

And that's just how it will stay It must be you that's always walking in my dreams

It must be you who'll always be right next to me

So when you find yourself alone

Just think of me and I'll be there

Must be you by my side the whole way through Just like the fresh white winter snow

Our love is pure and it will always grow

And when we're in those autumn years

Together, we'll look back, but we won't shed a single tear It must be you that's always walking in my dreams

It must be you who'll always be right next to me

So when you find yourself alone

Just think of me and I'll be there

Must be you by my side the whole way through When you find yourself alone

Just think of me and I'll be there

Must be you by my side the whole way through
