

Stacy

Socialburn

She'll take you down
She'll spin you round
She'll make your head explode
Like no one else in town will But turn your back
She'll walk away
She'll make you want to stay
Like no one else in town will Once you watch out your head will explode
Watch out your head will explode She'll get you drunk
She'll make you drive
She'll make you want to stay alive
Like no one else in town will She'll smoke you out
She'll get you high
She'll make you want to die
Like no one else in town will Once you watch out your head will explode
Watch out your head will explode
Watch out your head will explode Like no one else in town will
Like no one else in town will She'll make your head explode
Watch out your head will explode
Watch out your head will explode
Watch out your head will explode
She'll make you want to die
She'll make you come back for more Like no one else in town will
