

# The Operator

## The Operator

The operators came and took me away, took me away  
Everybody laughed, remember the day they took me awayI know what they're looking for  
Don't think I'll ever knowThey laid me on the bed, drilled my head, the incision bled  
Put wires in my brain every now and again, I remember a nameAnd as I drift away into my hiding place  
A maze of alleyways where the cameras cannot seeThe operators came and took me away, took me away  
Everybody laughed, remember the day they took me away  
Remember the day they took me away  
Remember the day they took me away
