

Time Goes By

Squad Five-O

Thoughts roam my mind as headlights shine
Piercing the darkness around
The wheels roll on like the days of my life
Into the future aheadI watch the cars go past as they go the other way
Sometimes my thoughts follow then back into yesterday
Behind me lies an old and familiar place
Ahead uncertainty is staring me right in the faceSing out loud to stay awake as time goes by
I watch the night turn into day and time goes by
I've turn the corner into another world a different place in time
Like a vapor on the road, so are those days of our livesFour kids in a van, on a mission from God
Driving from state to state guided by the road
Behind us lies an old and familiar place
Ahead uncertainty is staring me right in the face
