

Where I Found You

Future Islands

I remember your smile
The smell of your skin
The way that you walked
And laughed

And I remember our room
And coming home to you
I remember our room
And you

Look back hold onto the last
Don't let today push out the past
You've gotta look back, look back
Hold on 'til the last

I remember the drive with and without you
One road I took to catch you
The other road I took to leave you,
Where I found you

And I remember that day
We sat in some strange bar
With nothing much to say
Nothing at all

I loved you
And I still do
You know I loved you
And I still do

Look back, hold onto the last
Don't let today push out the past
You've gotta look back, look back
Hold on 'til the last

I loved you
And I still do
You know I loved you
And I still do

Look back, look back

Look back

Hold on 'til the last
