# The Other Guy

## Little River Band

I found out that you care for another guy
I found out that you want for another smile
We are alone as two different people can be
And it's hurting me so just to know that you don't care for meThe other guy won't be around to talk to our kids
He won't understand when you're down the way that I did
We had it all you and I
We just need to try againI found out that your hearts with another guy
You found out that you're telling another lie
We've come apart, we're going our own separate ways
And you don't understand why I love you and want you to stayThe other guy won't be around to talk to our kids
He won't understand when you're down the way that I did
We had it all you and I
We just need to try againYou don't know, it's me that you need
You're thinkin' of him and I can't compete
But I'm here to say
I still want you back againThe other guy won't be around to talk to our kids
He won't understand when you're down the way that I did
We had it all you and I
We just need to try againThe other guy won't be around to talk to our kids
He won't understand when you're down the way that I did
We had it all you and I
We just need to try againThe other guy won't be around to talk to our kids
He won't understand when you're down the way that I did
We had it all you and I
We just need to try again
