

Stop!

Against Me!

Stop! Take some time to think, figure out what's important to you

Stop! Take some time to think, figure out what's important to you

You've got to make a serious decision

Stop! Take some time to think, figure out what's important to you

Stop! Take some time to think, figure out what's important to you

Stop! Take some time to think, figure out what's important to you

You've got to make a serious decision It could be me up there in stage lights

It could be me on the TV in you living room

It could be me jet setting with my band all across the world

Appearing live in concert one night only, tickets sold out Stop! Take some time to think, figure out what's important to you

Stop! Take some time to think, figure out what's important to you

Stop! Take some time to think, figure out what's important to you

You've got to make a serious decision There I am giving candid disclosure to press in interview

There I go on my way through the crowd up to the podium

On behalf of our fans we'd like to accept this award

Smile for the camera boys, gold record in hand Stop! Take some time to think, figure out what's important to you

Stop! Take some time to think, figure out what's important to you

Stop! Take some time to think, figure out what's important to you

You've got to make a serious decision All of our lives in waiting

All of our lives traded for their roses and applause

All of our lives dedicated to shoving it right back in their fucking face Stop! Take some time to think, figure out what's important to you

Stop! Take some time to think, figure out what's important to you

Stop! Take some time to think, figure out what's important to you

You've got to make a serious decision

I said you've got to make a serious decision Stop! Take some time to think
