Defragmentation

Nasum

Defrag the information
Sort out the damaged
A process to gain more power
To speed it all upToo much shit clogging up the system
Heading for a meltdown
Scan and find unnecessary blockings
Slowing down the processJust like a damaged file
We must heal and reboot
And start it up again
To get somewhereCorrupt transmission
Damaged information
Slaves under the error
End of file, end of life
Redirect or dieJust like a damaged file
We must heal and reboot
And start it up again
To get somewhereDefrag the information
Sort out the damaged
A process to gain more power
To speed it all upToo much shit
Way too much fucking shit
In the system
