Impatience

We Are Scientists

I'm not calming down
What's this all about?
All I know is I don't need this tone you're taking
Forget what I said
For every promise kept
There's a thousand I don't even know I'm making
So it's time that you stop being so impatient
Oh, it's time that you stop being so impatient
Your philosophy
Is totally lost on me
Well, I promise I don't mean to have you waiting
And that attitude
Won't do any good
When the problem's only as real as you've made it

So it's time that you stop being so impatient
Oh, it's time that you stop being so impatient
Why not try to take it down?
You're gonna have to wait this out
Or tell me now where the fuckin' fire is
Your philosophy
Is totally lost on me
Well, I promise I don't mean to have you waiting
And that attitude
Won't do any good
When the problem's only as real as you've made it
So it's time that you stop being so impatient
Oh, it's time that you stop being so impatient
You're so impatient, you're so impatient, you're so impatient
