

Space Exploration Disaster

Sunflower Bean

In the year 2013
No one can hear you scream
Float away from the planet
(float away from the planet)
Float away from the planet
Going a thousand miles an hour
Float Away from the planetIn the year 2013
This is the year, where it all come clean
Float away from the planet
(float away from the planet)
Float away from the planet
and all the horrible people on it
Float away from the planet
All the men were calm on the ship
'Cause they knew it would be quick
All the men were calm on the ship
As the anticipation builds
And I pray to God, they send an Angel
And I pray to God, they send them an Angel
And they got down on their knees
And they asked oh please, please
But God just turned his head away
Float away from the planet
(float away from the planet)
Float away from the planet
(float away from the planet)
