

# Christian Animation Torch Carriers

## Guided by Voices

Sometimes her mother will work with her  
But There's nothing wrong with her  
There's nothing wrong with her  
There's nothing wrongSo such is life that it writes itself  
Trying to right itself  
But There's nothing wrong with it  
There's nothing wrongAnd every single day without much to say  
These apparitions raise a toast to their kindThe people who are these things  
Are not afraid with you  
And caring must go with the wisdom  
Of their selectionsNever can touch their sign language  
So is the cost of sound barriers  
Even as though she's still searching  
For a cloud with a silver lining  
We pray for her  
She's burning slow  
Out on a mission's lightChristian animation torch carriers  
This is a shallow hole but faith makes it safe  
Hiding inside a grave with no sound  
No witness to see  
With or without youChristian animation torch carriers  
However will you learn their sign language  
However will you try to hide  
Within their eyes?  
Within them in life?
