

A Place in the Sun

Tim McGraw

Long ago, far away
I felt your lovin' glow upon my face
Was it a dream or just a promise made
What is my destinySomeday I'll find a way to shine
Leave all these rainy days behind
I know there's got to be
Some place warm and bright for me
I'm running out of places I can run
Looking for a place in the sun
Darkness hangs overhead
Close to the point where angels fear to tread
I close my eyes and think of you instead
And pray you'll be here soonSomeday I'll find a way to shine
Leave all these rainy days behind
I know there's got to be
Some place warm and bright for me
I'm running out of places I can run
Looking for a place in the sunSometimes it feels like this whole world's against me
And every beaten path
Is just another winding road that tempts me
Far from you and all that's true
I've got to find my way again
Someday I'll find a way to shine
Leave all these rainy days behind
I know there's got to be
Some place warm and bright for me
I'm running out of places I can run
Looking for a place in the sunYeah I'm running out of places I can run
Looking for a place in the sun
Oh, won't you shine down on me Sunshine?
