

# Heart of the Night

Juice Newton

Dark city streets  
Twist and moan in the heat  
As night descends  
Two searching eyes  
Cut their way into mine  
Inviting me in Dancing so close  
We already know  
How good it will be  
We slip out  
From the unseeing crowd  
We find what we need In the heart of the night  
We run like bandits  
(In the heart of the night)  
Two hungry hearts under the gun  
In the heart of the night  
(Heart of the night)  
When we find each other  
We're stealing love on the run  
In the heart of the night  
Heart of the night The cool city moon  
Lays its touch on the room  
Your eyes reach to me  
Two shadows fall  
Saying nothing at all  
We know what we need In the release  
Two prisoners are free  
From all darkness  
One more escape  
Surviving the heartache  
And madness In the heart of the night  
We run like bandits  
(In the heart of the night)  
Two hungry hearts under the gun  
In the heart of the night  
(Heart of the night)  
When we find each other  
We're stealing love on the run  
In the heart of the night  
Heart of the night In the heart of the night

(Heart of the night)  
When we find each other  
We're stealing love on the run  
In the heart of the night  
Heart of the nightIn the heart of the night  
In the heart of the night  
(In the heart of the night)
