

# Don't Forget About Me

## emphatic

I know time will come and try to take away these memories  
but no matter how far I go I won't forget  
Well I know I might not see some of these faces again  
Why do all good things have to end  
I remember the first day when I saw your face you kept me on track  
Now I'm watching years as they disappear looking back

Don't forget about me no matter what you do  
Don't forget about me I'm always here for you  
Don't forget about what we had our time here might be through  
Don't forget about me and I'll always remember you

Some will stay and some will go  
See how the next page begins  
But we will always have this chapter you and me  
I've got my songs there's no right or wrong I've just got to see wherever you are I hope your listening

Don't forget about me no matter what you do  
Don't forget about me I'm always here for you  
Don't forget about what we had our time here might be through  
Don't forget about me and I'll always remember you  
We'll say our goodbyes with tears in our eyes it's okay to move on just know I'll never let you go

I remember the first day when I saw your face you kept me on track  
Now I'm watching years as they disappear looking back  
Don't forget about me no matter what you do  
Don't forget about me I'm always here for you  
Don't forget about what we had our time here might be through  
Don't forget about me and I'll always remember you  
Don't forget about me no matter what you do..remember you
