

The Night

[Lauren Nikohl](#)

The stars only come out at night
They show me that there's more than life on earth
So far they are from me
Yet somehow show me I'm freeThe sky is so wide
It gives off light
To this beautiful lifeMy soul, it longs to know
Where on this earth
I ought to beShow me the galaxy
There's so much to learn and there's so much to see
My life is much smaller than it seems to beTell me the mystery
The answers aren't as clear as they ought to be
The night only tells a part of the storyNightThe stars only come out at night
They show me, show me
I'm free
