

Blood Makes Noise

Suzanne Vega

I'd like to help you doctor
Yes I really, really would
But the din in my head
It's too much and it's no good I'm standing in a windy tunnel
Shouting through the roar
And I'd like to give the information
You're asking for But blood makes noise
It's a ringing in my ear
Blood makes noise
And I can't really hear you
In the thickening of fear I think that you might want to know
The details and the facts
But there's something in my blood
Denies the memory of the acts So just forget it doc and
I think it's really cool that you're concerned
But we'll have to try again
After the silence has returned 'Cause blood makes noise
It's a ringing in my ear
Blood makes noise
And I can't really hear you
In the thickening of fear I'd like to help you doctor
Yes I really, really would
But the din in my head
It's too much and it's no good Blood makes noise
It's a ringing in my ear
And I can't really hear you
In the thickening of fear Yes blood makes noise
It's a ringing in my ear
And I can't really hear you
In the thickening of fear Blood makes noise
Blood makes noise
Blood makes noise
