

Fake Spit

Best Friends

It's funny now, it's funny how
You wait until your head comes off
It's funny how you watch it roll
around, around, around
It's funny now, It's funny how
You spit and swallow all the time
It's funny how you spit into the ground It makes me sad to see you cut your nose
To spite your face
And watch it go to waste
And would it be so hard to try? It's fake, It's funny
It's fake to think that we are not the same.
