

Blood & Ice Cream

For Our Hero

Give me a night worth forgetting with you, with you.
Swing the pendulum in front my head, so I dont remember a thing, whoa.
Youre the prophet in the black book of the organized religion of me.
Say you are a genius, but I'm the mad scientist of the chemicals that bend you. Permanently perplexed, said like
he could care less;
The pill's okay but baby make me feel new
Ooh, ooh darling I got a dark side
Maybe my moods change when the head spins
Give me give me give me a night worth forgetting with you.
Darling I got a dark side
Prototype of your dreams & the head spins
Give me a night worth forgetting with you I find happiness in knowing that each one of these moments is
somebodys last.
Oh, how youre just ghosts with unfinished business,
Channeled by the mediums of our hips, whoa
They say your tragedies written, that I got your wax wings sweating
But I'm your lover on knees but it didnt mean a thing Permanently perplexed, said like he could care less;
The pill's okay but baby make me feel new
Ooh, ooh darling I got a dark side
Maybe my moods change when the head spins
Give me give me give me a night worth forgetting with you.
Darling I got a dark side
Prototype of your dreams & the head spins
Give me a night worth forgetting with you Testify like a lunatic; anyones my asylum, I guess my head's still sick.
Uh-uh
Testify like a lunatic; anyones my asylum, I guess my head's still sick.
Uh-uh Ooh, ooh darling I got a dark side
Maybe my moods change when the head spins
Give me give me give me a night worth forgetting with you.
Darling I got a dark side
Prototype of your dreams & the head spins
Give me a night worth forgetting with you.
