It's You

Ryan Cabrera

Another night goes by without sleeping
'Cause I know I won't wake up next to you
Another life goes by without dreaming
And I can't help but think that mine will tooI'm standing before you with this label on my head
I'm pleading before you for you to understandBaby it's you
When I look up in the sky, I see you
Then I turn and close my eyes and it's you
When I'm sittin' all alone in my room
Everything reminds me of youThe time is slow and I am sinking
Into a hole blackened with lies
And though I made it myself
You stand watching as my life passes me byI'm standing before you with this label on my head
I'm pleading before you for you to understandHow much I adore you
I'll be there till the end
When everything falls down
Will you hold my hand?Baby it's you
When I look up in the sky, I see you
Then I turn and close my eyes and it's you
When I'm sittin' all alone in my room
Everything reminds me of youYeah, yeah, baby it's you
When I look up in the sky I see you
Then I turn and close my eyes and it's you
When I'm sittin' all alone in my room
Everything reminds me of you
