

First Thing On Your Mind

Vanessa Williams

Nine, ten
A little more giving, a little less take
A little more time to bend so we don't break
A little less anger, a little less pain
A little more love will surely stop the rain
If you asked me if I thought that you loved me
I'd say I know it
But sometimes I need you to show it so baby
Kiss me when you get out of bed, say the words that never get said
Lovin' me should always be the first thing on your mind
Tell me what I already know hold me like you'll never let go
Lovin' me should always be the first thing on your mind
A little more laughter, a little less tears
A little more compromise to see us through the years
A dream in the makin', a place of our own
A little more give and take will make a happy home
If you asked me if I thought that you loved me
I'd say I know it
But sometimes I need you to show it so baby
Kiss me when you get out of bed, say the words that never get said
Lovin' me should always be the first thing on your mind, yeah
Tell me what I already know, hold me like you'll never let go
Lovin' me should always be the first thing on your mind
Give all you have to give
Never save a lovin' for another day
If you believe in this
Never save a lovin' for another day
Yeah, yeah, hold me yeah yeah
Oh baby love me, oh yeah
Lovin' me should always be the first thing on your mind
Love me, you better hold me, hey
Lovin' me should always be the first thing on your mind
First thing, first thing on your mind
Kiss me when you get out of bed, say the words that never get said
Lovin' me should always be the first thing on your mind
Tell me what I already know, hold me like you'll never let go
Lovin' me should always be the first thing on your mind
Kiss me when you get out of bed, say the words that
never get said
Lovin' me should always be the first thing on your mind
Tell me what I already know hold me like you'll never let go
Lovin' me should always be the first thing on your mind
