

Angels With Enemies (EP Version)

Lovedrug

And I don't think we'll get out of this hell
But the time here with you has been nice
A cold love bloody knuckle trigger finger riding on the edge of mind
A salute to the end of the world
And a beautiful end for you girl Because all night I've been picking fights with the fur men
And the bar stool kings
And when it sounds right I'll bring them down to their knees son
And with the glorious red, we'll be off with their heads Phantoms in the courtyard waiting on the breeze to float
after me
To a chamber of wailing ferns
The calm yellow air and the dark woolen skies say our villains will arise
Oh haunted by two's they wake by you But it's alright
In a scissor hell
And it's alright to fall deep in love
Because all night
I'll be following matches into the dawn light
where I melt you You gotta pull stars down to be someone
And when you've chemi-claimed the sun you gotta
When oceans fill your life somehow
You gotta break the damn and wave to yourself
You got pull stars down to be someone
And when you chemi-claimed the sun you got it
And when oceans fill your life somehow
You gotta break the damn and wave to yourself And sometimes in a silver hell
You gotta search for gold
And in the right light
We're just angels with enemies
