Full Blown Love

Broods

[Verse 1]
Watching the world, take on a new form
All that I knew then, fades to oblivion
So sure that I had, had what I needed
I should've seen it, from the beginning[Pre-Chorus]
We drive into the night, away from the life
Bringing us down, oh
We try keeping it light
But we can't deny, we already know, oh[Chorus]
This is full blown love
This is full blown love
This is full blown love[Verse 2]
We greet the world, from under your shelter
Not even the morning, could dull down the feeling
I fall into you, you're trying to prove
You meant every moment, I already know it[Pre-Chorus]
We drive into the night, away from the life
Bringing us down, oh
We try keeping it light
But we can't deny, we already know, oh[Chorus]
This is full blown love
This is full blown love
This is full blown love[Bridge]
Away through the night, and into the dawn
Away from it all, it don't mean a thing to me anymore
Well maybe for us, just one night of love was never enough
Cause I can't give give up
No I can't give up[Pre-Chorus]
We drive into the night, away from the life
Bringing us down, oh
We try keeping it light
But we can't deny, we already know, oh[Chorus - Variation]
This is full blown love
This is full blown love
This is full blown love
This is full blown love
Away through the night, and into the dawn
We already know
This is full blown love

Away through the night, and into the dawn
We already know
This is full blown love
