

# To the Stars (ANiMAL Remix)

## Modestep

Now that you've gone to the stars  
Now that the storm has finally come  
So now that you've gone to the stars  
Now that the storm has finally come When these colors fade to gray,  
You're a million miles away.  
You're a million miles away.  
You're a million miles away.  
When these colors fade to gray Now that you've gone to the stars  
Now that the storm has finally come So now that you've gone to the stars  
Now that the storm has finally come  
Now that the storm has finally come  
Now that the storm has finally come When these colors fade to gray,  
You're a million miles away.  
You're a million miles away.  
You're a million miles away.  
When these colors fade to gray... So now that you've gone to the stars  
Now that the storm has finally come  
Now that the storm has finally come Now that you've gone
