Here

Vertical Horizon

Here is the place where the light is made
Come make a wish as the night fades
Is there snow on the beach
Where we used to swim?
The rocks just out of reach
As the tide rolled in
It's so much better with you here
I want you close my dear
When my roads are down
You turn me around
It's never easier alone
Finding my way home
When I'm nowhere near
I want you here
Watch as they run we can follow close
Lie in the sun when it matters most
It's so much better with them here
It's all so perfectly clear
We know there's love
And someone above
I don't ever want to be alone

The thought chills me to the bone
I'll preserver but I want them here
All that's left to write
I love you more than light and dark
And distant stars
If all the streams dried up
I'd just drink you up
Here is the place
Where the love is made
It's so much better with you her
I want you close my dear
When my roads are down
You turn me around
It's never easier alone
Finding my way home
When I know what I fear
I want you

And all my fears disappear
It's all so clear
I want you here
I want you here
I want you
