

Death Do Us Part

Ringworm

You can't live to make mistakes
When you're dead and gone
With your heart held in my head
The memory of your bloodstains
All over broken picture frames How could you tell me that I was wrong?
When you would have done the same
Toy with emotions until they're gone
You would have done the same I stole your heart ripped it out
And smashed it on this floor
You have no need for such a useless thing
Broken, forever more Life after this there's no such thing
You replace my thoughts
With these painful memories
Now you're gone you're 9 feet under
To far down to ever uncover How could you tell me that I was wrong?
When you would have done the same
Toy with emotions until they're gone
You would have done the same I stole your heart ripped it out
And smashed it on this floor
You have no need for such a useless thing
Broken, forever more Leave it all to me
I won't forget about you
Leave it all to me
I'll steal your heart
Leave it all Leave it all to me
I won't forget about you
Leave it all to me
I'll steal your heart
Leave it all I stole your heart ripped it out
And smashed it on this floor
You have no need for such a useless thing
Broken, forever more I stole your heart ripped it out
And smashed it on this floor
You have no need for such a useless thing
Broken, forever more Now you're gone
You're 9 feet under
To far down to ever uncover Now you're gone
You're 9 feet under
