The Dark

Dolly Shine

Thinkin' too much lately
Ain't it just like me now baby oh
but tell me what's a boy supposed to do

Star crossed lovers from the start
Was always meant to break your heart
And to tell the truth I guess you broke mine too

Now I swear I never meant you any harm
We were only good together in the dark
Only good together in the dark

Somewhere locked up deep inside
Down where all this heart ache hides
I got somethings I'd like to say to you

Back and forth and back again
We'll send it all into tailspin
I'll beat my heart until its black and blue

And I swear I never meant you any harm
But we're only good together in the dark
Only good together in the dark

Gettin over you was a hard thing to do
Found out I ain't bullet proof
I like to say I'm doin alright
But we both know that ain't true

Just for the night, now lets pretend
I'm still the one you want
And in the morning when you wake up
If you still don't, than you don't

And I swear I never meant you any harm
But we're only good together in the dark
Only good together in the dark
