

# What Would a Wookiee Do?

## Clutch

Two oaken doors  
Open two floors  
Imported marble  
Victorian drawers They go between  
Bucolic scenes  
Machiavellian  
And all the lesser name schemes Greyhounds and rabbits  
Go 'round and 'round  
But everybody scatters  
When the Hindenburg goes down Robber baronesses  
Carpet baggersese  
But honestly speakin', now  
We all got the same disease I'm afraid the party's canceled  
The servants never showed  
And all the world was penciled  
On this foreboding note Force gettin' ready  
Man, we get too much  
All the world suffers  
The wookiee's wicked clutch The theocrats  
With cricket bats  
Has a lot of love to give ya  
Never take it back A graver danger  
You bounce and rape her  
Medulla oblongata go  
I'll see you all later Our fist is draggin'  
One leg behind  
And when the trap is sprung  
The warrior loses his mind Assassins trippin'  
High on hashish  
But honestly speakin', now  
We all need the same relief One day or another, kid  
Our world will be gone  
One day or another, kid  
Our death will be done One day or another, kid  
Our world will be gone  
One day or General borders  
You have your orders  
Invisible free masonry  
Incoming mortars The fly is landing

And are demanding  
Keep on firing until  
The last man standing Stock cars and habits  
Go 'round and 'round  
But everybody scatters  
When the stock market goes down Robber baronesses  
Carpet baggersese  
But honestly speakin', now  
We all got the same disease I'm afraid the husband canceled  
The gang never showed  
And all the tread was pranced  
On this foreboding note Force gettin' ready  
Man, we get too much  
All the world will suffer  
The wookie's wicked clutch
