Stop It!

The Almost

it seems like every time we're here I look right back at you.
and as your eyes perk up and you say and boy don't you come unglued
I'll be so kind of busted up, on your floor
I'll make a change, so that you want me more
So that you want me more!

Is this really my idea I had no clue that all of this is really happening
my thoughts remain, lying on the floor
its not my fault i'm such a allfull messy war

and now we're here at break next beach oh just to make me feel
less aware of all the time this the times I made you
as stronger than you really wanted to
and make a face that says you know just want to do
You know just what to do!

Is this really my idea I had no clue
that all of this was really happening
my thoughts remain, lying on the floor
its not my fault im such a awful messy war
War!

it's true I fell but your love covers me
its true I fell!

Is this really my idea I had no clue that all of this really happening
my thoughts remain, lying on the floor
its not my fault im such a allful messy war
Is this really my idea I had no clue, that all of this was really happening
my thoughts remain lying on the floor
its no my fault im such a awful messy war
