

Just a Touch Away

Echo & The Bunnymen

You said you could make it disappear
Make my pathway clean and clear
You said I was just a touch away But I'm not even close, no, nowhere near
You said you could make it disappear
Make my pathway clean and my pathway clear How'd you want to go? Should we go together?
I don't want to go, gonna live forever, live forever Shadows in the fog are moving in
From the world outside to my world within
I'm sucking on the dust that moves the air The pieces move but I'm still there
Shadows in the fog are moving in
From the world outside to my world within How'd you wanna go? Calm or stormy weather
If we've got to go, let's go together, together You said you could make it disappear
Make my pathway clean and clear
You said I was just a touch away But I'm not even close, no, I'm nowhere near
You said you could make it disappear
Make my pathway clean and my pathway clear How'd you want to go? Should we go together?
I don't want to go, gonna live forever, live forever
Live forever, live forever, live forever La, la, la, la, la, la, la, la, la, la
La, la, la, la, la, la, la, la, la, la
La, la, la, la, la, la, la, la, la, la
