

Who Said the World Was Fair

Hall & Oates

If there's enough to go around
If there's enough to go around why can't I get mine
If everybody knows they've been lied to
If everybody knows it, then why are they waiting on a gas line I think it must be a test to weed the best from the
rest
But whatever they're doing is driving us out of our minds
It drives us out of our minds
But we always take it 'cause Who said the world was fair
Or that we should care
What a way of thinking, yeah Who said the world was fair
Or that we should care The sun is free enough
It's shining there in the air, out of our reach
But if they can, they'll find a way
To make us pay for what we get
When we lay out on the beach I think it must be a test to weed the best from the rest
But whatever they're doing is driving us out of our minds
They drive us out of our minds
But we always take it 'cause Who said the world was fair
Or that we should care
What a way of thinking, yeah
Who said the world was fair
Or that we should care Who said the world was fair
Or that we should care
Who said the world was fair
Or that we should care Who said the world was fair
Or that we should care
Who said the world was fair
Or that we should care I ain't gonna take it, no
You ain't gonna take it, no
I ain't gonna take it, yeah
Who said, who said, who said
