

# Far Away in a Moment

## October Project

Far away in a moment  
Where the sun is all you want to drink in  
Kiss the mouth of the river  
As you let your own reflection sink in  
Will you stay until the season changes  
Will you stay until you understand  
You could travel here forever  
Rising brightly like a star  
Far from anything you thought you knew  
Far from everything you are  
At the edge of a mountain  
Where you thought you were afraid to fly  
You reach out into heaven  
Till the sky is opened up inside you  
In the beauty of a perfect stranger  
Understanding what it means to love  
You could travel here forever  
Rising brightly like a star  
Far from anything you thought you knew  
Far from anything you are  
And I had a conversation  
Where I almost could remember  
Where I knew what you were thinking  
And I knew what I was feeling  
And I knew that it was different  
But it really didn't matter  
For it might have been the first time  
Where I knew that I could finally  
Feel all right  
In the moment where the season changes  
Understanding what it means to live  
Will you travel here forever  
Dying brightly like a star  
Far from everything you thought you were  
Into everything you are
