

A Christmas Time With You

[Mark Masri](#)

Never thought the winter'd come so quickly.
Never thought you'd fade away so fast.
People walking hand in hand through the winter wonderland
Makes me think of holidays for two I'm wishing you were with me through this cold December
Still I keep believing some things last forever
Hoping that of all my dreams this one might come true
So I'm wishing for a Christmas time with you The postman's outside dropping off his letters
Christmas cards from everyone but you
Maybe it'll take awhile to send your message cross the miles
But the twenty-fourth is going to be here soon. I'm wishing you were with me through this cold December
Still I keep believing some things last forever
Hoping that of all my dreams this one might come true
So I'm wishing for a Christmas time with you Your head on my pillow makes my world seem right.
Snowflakes through my window bring me light. So I'm wishing you were with me through this cold December.
Wondering if you're thinking about our times together.
Reminiscing yesterdays just isn't gonna do.
So I'm wishing for a Christmas time.
No other wish could I combine
So I'm wishing for a Christmas time with you.
