

# Somewhere In Stockholm

[Avicii](#)

That's me right there on the corner  
Listening to Wu in my Walkman  
Neon lights hit the water, reflecting the city I'm lost in  
That's me right there on the corner  
I one day will be leaving  
For a dream that I didn't have  
That I'd one day would be leaving  
Stranger how the same place I ran from the same place I think of whenever the chance comes  
Its inevitable cause wherever I go I hear echoes of a thousand screams  
As I lay me down to sleep  
There's a black hole deep inside of me  
Reminding me  
That I lost my backbone, somewhere in Stockholm  
I lost my black hole, Somewhere in Stockholm I'm from a place where we never  
Openly show our emotions  
We drown our own sorrows in bottomless bottles  
And leave them to float in the ocean  
I'm from a place where we never  
Separate people from people  
So generalize but in generalize I still believe that we're treated as equals  
My father, my mother, my sister, my brother, my friends and my families there  
My hope and my money my innocents, in a sense almost lost everything here  
Right where I was founded, is right where I'll be found dead  
These streets are my backbone  
Until I get back home I hear echoes of a thousand screams  
As I lay me down to sleep  
There's a black hole deep inside of me  
Reminding me  
That I lost my backbone, somewhere in Stockholm  
I lost my backbone, somewhere in Stockholm I'm not alone, I am the fire that burns not in the city but out in the  
'burbs  
A river that's dying of thirst  
I am a reverend lying the church  
A crack in the pattern  
A miracle waiting to happen  
A promise that never was kept  
One of those moments you'll never forget  
I am the feeling inside, the one we all know but can't really describe  
I am the blood spill, but I'm in love still

(Somewhere in Stockholm)  
But I'm not alone, don't have to get by on my own  
I'm finally home  
Hemma I Stockholm? (Swedish for 'At home in Stockholm')  
(yeah)I hear echoes of a thousand screams  
As I lay me down to sleep  
Theirs a black hole deep inside of me  
Reminding me  
That I lost my backbone, somewhere in Stockholm  
I lost my backbone, somewhere in Stockholm
