Serpentine Fire

Earth, Wind & Fire

When I see your face like the morning sun you spark me to shine
Tell all the world, my need is fulfilled and that's a new design
As long as you're near, there is no fear of a victory
But when I'm away, influences stray my mind to disagree
I wanna see your face in the morning sun ignite my energy

The cause and effect of you has brought new meaning in my life to meGonna tell a story morning glory all about the serpentine fire

Gonna tell a story morning glory all about the serpentine fireOh yeah, oh yeah, oh yeah Oh yeah, oh yeah need to see your face like the morning sun ignite my energy

The cause and effect of you has brought new meaning in my life to me

The moments I find when I'm inclined to do my best

Negative wins when I give in and then I lose the testGonna tell a story morning glory all about the serpentine fire Surely as life begun, you will as one battle with the serpentine fireOh yeah, oh yeah, oh yeah yeahSurely as life begun, you will as one battle with the serpentine fire Surely as life begun, you will as one battle with the serpentine fireGonna tell a story morning glory all about the serpentine fire

Gonna tell a story morning glory all about the serpentine fire
