

# Make Believe

## Backstreet Boys

We can only make believe  
We can only make believe Something that you said got into my head  
Here I am falling from the edge  
Waiting for the day I can run away with you with you  
Like angels on fire we burn the sky  
One kiss and we say goodbye If we could only make believe  
You and me together  
We could be king and queen  
Rule another world forever  
We'd set our course to live or die  
Across the universe  
I'd be by your side  
If we could only believe  
We can only make believe  
We could only make believe Catch another breath I got nothing left  
This love I have is pulling me to death  
Waiting for the night I can feel alive with you  
Like angels on fire we burn the sky  
One kiss and we say goodbye If we could only make believe  
You and me together  
We could be king and queen  
Rule another world forever  
We'd set our course to live or die  
Across the universe  
I'd be by your side  
If we could only believe  
We can only make believe  
We could only make believe If we close our eyes  
Let our hearts collide  
Leave the world outside  
Leave it all behind  
If we close our eyes  
Let our hearts collide  
Leave the world outside  
Leave it all behind  
Leave the world outside  
Leave it all behind If we could only make believe  
You and me together  
We could be king and queen

Rule another world forever  
We'd set our course to live or die  
Across the universe  
I'd be by your side  
If we could only believe  
We can only make believe  
We could only make believe If we close our eyes (If we could only make believe)  
Let our hearts collide (If we could only make believe)  
Leave the world outside (If we could only make believe)  
Leave it all behind (If we could only make believe)  
If we could only make believe  
If we close our eyes (If we could only make believe)  
Let our hearts collide (If we could only make believe)  
Leave the world outside (If we could only make believe)  
Leave it all behind (If we could only make believe)
