Extremes

Cynic

Society's selfish meaning to confine
Disabled by the need to cure an insecurity
Masses strive to keep themselves in line
While the radical seek attention all the timeSay they're sick - just hypochondriacs
Cry some more, I know it's all an actLies...taken to extremes
Despised...because of what they needA selfish thought to please themselves
They strive to succeed in what they're looking for
Defying, lying, rebelling for attention
A disability taken from one extreme to another[chorus]Abusing rights, defying given laws
Excessive whining, they desire sympathy
Rebel, they prove their lives are just a flaw
Immoderate acts plagued by the diseaseI proved them wrong but they're the ones to blame
Defeated fair and square at their own game
