

# The Story

## Allure

He was a memory I can't erase  
Like a dream come true from out of the night  
When I first saw you our eyes met face to face  
I knew right then and there that it would be right Just when I thought I was over love  
Baby you stepped right into my life  
Will we be lovers or just the best of friends  
Or will the story just come to an end? Was I just a victim of circumstance  
Or just a fool who fell too quickly in love  
But, when I saw you, there was someone else  
And I knew I could not, could not be, not be second best, no, no, no, no Just when I thought I was over love  
Baby you stepped right into my life  
Will we be lovers or just the best of friends  
Or will the story just come to an end? Chapter 1, momma told me when a boy meets girl  
Chapter 2, that you see rainbows, stars shining in your world  
Chapter 3, but when it's over the writing's on the wall  
Don't you keep cryin', no, no just keep movin' on, keep on moving on Just when I thought I was over love  
Baby you stepped right into my life  
Will we be lovers or just the best of friends  
Or will the story just come to an end? Just when I thought I was over love  
Baby you stepped right into my life  
Will we be lovers or just the best of friends  
Or will the story just come to an end? Just when I thought I was over love  
Baby you stepped right into my life  
Will we be lovers or just the best of friends  
Or will the story just come to an end? Just when I thought I was over love  
Baby you stepped right into my life  
Will we be lovers or just the best of friends  
Or will the story just come to an end?
