

# Pull the Trigger (feat. Cammie Robinson)

## Flux Pavilion

### [Verse 1]

These days it's better just not to talk

Just watch the way you're walking

Everybody watches what we do

Isn't it strange never thought it would have been this way

Doesn't matter what I say

Cause I know that nothing has changed[Bridge]

You fired off like a smoking gun

Left me for dead like a hit and run

You make me feel like there is something to fight for

but there was just nothing at allAnd I am standing here chasing all my fears

But I've got nothing, nothing more to give you

And I'm trying hard I've played all my cards

But I've got nothing[Hook]

Why don't you just pull the trigger?

Why don't you just pull the trigger?

Why don't you just pull the trigger?

Why don't you just pull the trigger?[Bridge]

You fired off like a smoking gun

Left me for dead like a hit and run

You make me feel like there is something to fight for

but there was just nothing at allAnd I am standing here chasing all my fears

But I've got nothing, nothing more to give you

And I'm trying hard I've played all my cards

But I've got nothing[Hook]

Why don't you just pull the trigger?

Why don't you just pull the trigger?

Why don't you just pull the trigger?

Why don't you just pull the trigger?[Outro]

And I am standing here chasing all my fears

But I've got nothing, nothing more to give you

And I'm trying hard I've played all my cards

But I've got nothing

Why don't you just pull the trigger?
