By My Side

Dream Evil

With venom of steel, the enemy's closing in
With dark intentions and souls of black
Blood in the wind, a battle that can't be won
Thunder of steel - Lightning attackThere is no way out of here
Hordes of warriors everywhere
Smell of death is drawing near
Come and fight me if you dareFight by my side - I will never let you down
Fight for your life - Till the end we're standing strongHell is unleashed, dead bodies on the ground
Few against many, that is what counts
Legions of doom, crush what is left of us
We need more men, we're going downThere is no way out of here
Hordes of warriors everywhere
Smell of death is drawing near
Come and fight me if you dareFight by my side - I will never let you down
Fight for your life - Till the end we're standing strongThere is no way out of here
Smell of death is drawing near
Fight me if you dareFight by my side - I will never let you down
Fight for your life - Till the end we're standing strong
Fight by my side - I will never let you down
Fight for your life - Till the end we're standing strong
