

# Speed of Light

## S.P.O.C.K

Our world is a terrible place  
There must be something better in space  
Or is just the time in which we live  
that has nothing good to give  
Let's grab a ship and blast away

because I don't want to die here, I don't want to stay When I see the stars above I know that I'm alive

We're going so fast  
we're leaving our past  
at the speed of light  
We'll be young when you are dead  
the future lies ahead  
at the speed of light

Our goal is to find a new home  
There is a chance: we are not alone  
But if there is nothing to be found  
plan B//2 is to turn around  
A year to us is a hundred to you

When we're back everything will be new When I see the stars above I know that I'm alive

I don't care what happens to me, because I know I'll survive

We're going so fast  
we're leaving our past  
at the speed of light  
We'll be young when you are dead  
the future lies ahead  
at the speed of light
