

# Triage

## Veruca Salt

It's now or never, whether we try  
I can't remember why

And I can't believe that you were together  
I don't believe you let her inside  
I can't believe she wrote me the letter  
Why did you bother to leave me alive

Alive and ticking inside

We said forever, until we die  
But we're all offenders  
We all lie

I can't believe that you were together  
I don't believe you let her inside  
I can't believe she wrote me the letter  
Why did you bother to leave me alive

Alive and ticking inside

I don't believe that you were together  
I can't believe you let her inside  
I don't believe she wrote me the letter  
Why did you bother to leave me alive...
