

# You Can't Stop

## Spitalfield

I'd been thinking how to tell you off  
Why do you forget everything I say?  
How can I always find the time to spend with you  
While you focus everything on me? This time, don't close your eyes  
And take your time, it's your time Been thinking of this for too long  
Who knows what to say now?  
If this is getting over him from now on  
Honestly, you're not, honestly you're You call and ask for me the time it's almost two  
You think you'd just look at your watch  
Why can't you forget everything you thought you knew?  
And stop pretending it's the truth This time, don't close your eyes  
And take your time, it's your time Been thinking of this for too long  
Who knows what to say now?  
If this is getting over him from now on  
Well honestly, you're not, honestly you're  
Focus, focus, focus This time, don't close your eyes  
And take your time, it's your time Hey hey, you know what to say now  
This is getting over him from now on You can't stop it, no no, you can't stop me  
You can't stop it, no no, you can't stop me  
You can't, you won't stop me, stop it now
