

Christmas Saved Us All

[Jon McLaughlin](#)

The hustle and the bustle
The lovers kissing in the cold
Moments making us feel old
In a good way
Like a song that plays forever And the millionth time you never
Get sick of hearing it
And over time you realize what it meant
And you sing loud
When you sing outChorus:
I keep closing my eyes just to feel it
And I keep watching the snowflakes fall
Always and forever I'll believe it
So hang the lights and deck the halls
Christmas saved us all The houses of red and green
Twinkle underneath the sky
And the reason for the season lives inside
Of our hearts now
And we sing outChorus Snow comes, covering the ground
Make a holy city of this town
And I lay in my bed like a kid
Dreaming 'bout all the things I did beforeChorus Christmas saved us all
