

Children of Tomorrow (Rastafari Children)

Morgan Heritage

Let's make it better for the children of tomorrow
For the children today
Let's make it better for the children of tomorrow
For the children today Mothers and fathers stop, and take a look around you
We've stood right here for light years
Time to move to higher ground
The whole world is angry, and feeding on itself
Said take care of all the children, cause they're our greatest wealth Let's make it better for the children of
tomorrow
For the children today
Let's make it better for the children of tomorrow
For the children today What about a dream of a better world
Where angels never die
Where true love is shared and hunger fed
We can make it, if we try Let's make it better for the children of tomorrow
For the children today
Let's make it better for the children of tomorrow
For the children today Open your heart that we may hear
The cry of our children, they're crying far and near Let's make it better for the children of tomorrow
For the children today
Let's make it better for the children of tomorrow
For the children today
