

Interleave (Feat. Hot Chip's Alexis Taylor)

Win Win

There's always been something that I can't say
You'll find it between all the notes I paid
And when everything that is spoke has been stripped away
You'll hear it ring after you're hit, there is night meets day I don't know if I will leave with you but
I believe in you
I don't know if I will leave with you but
I believe in you
I don't know if I will leave with you but
I believe in you
Everything I've ever wanted to do is
Interleave with you What I've got with you, all I see is fit
I need to hang on to the voice I hear
You tell me from deep in your heart that you need to breathe
and I read a lee where the cloth from the clothes you weave I don't know if I will leave with you but
I believe in you
I don't know if I will leave with you but
I believe in you
I don't know if I will leave with you but
I believe in you
Everything I've ever wanted to do is
Interleave with you
