Scream

Kelis

Been running in place for such a long time
Stuck in a race in the wrong line
When it all came down on meAnd I haven't had faith in such a long time
Am I out of place or out of my mind?
Should it all fall down on me?It's not enough to live so just dream
It's not enough to live so just dream
It's not enough to say so just screamYou'll never know

If you don't let it out

You've had enough

Don't call your bluffYou can't back down, lost in a crowd

You've won the right to scream and shout Don't talk about it, you've lost your cool

There is no point who makes the rulesSo let's get to it

Now you'll do it

Break outScream and shout

Scream and shout

Scream and shout

Scream and shoutBeen running in place for such a long time Stuck in a race in the wrong line

When it all came down on meAnd I haven't had faith in such a long time Am I out of place or out of my mind?

Should it all fall down on me?It's not enough to live so just dream

It's not enough to live so just dream

It's not enough to live so just dream

It's not enough to say so just screamSound the alarm

Raise your arms

You're on your own

But not aloneBig cities got you on the ground

Afraid to fight, don't make a sound

So let's get to it

Now you'll prove it

Push backScream and shout

Scream and shout

Scream and shout

Scream and shoutBeen running in place for such a long time
Stuck in a race in the wrong line

When it all came down on meAnd I haven't had faith in such a long time Am I out of place or out of my mind?

Should it all fall down on me?It's not enough to live so just dream
It's not enough to live so just dream
It's not enough to live so just dream
It's not enough to say so just scream
