Dark Clouds

U.N.K.L.E. Soundsystem

The wind it haunts the valleys
The rivers running away
The cities and the soil
The pavements, stones and the clay
Dark clouds are following you
But they'll drift away
I watched the night turning into a day
The memories, illusions
Are pouring over my mind
The beautiful confusion
A voyage into the night
Dark clouds are following you
But they'll drift away
I watched the night turning into a day

The lovers and the mothers
The summers spent in the sun
The living and the dying
The race is still to be run
Dark clouds are following you
But they'll drift away
I watched the night turning into a day
Dark clouds are following you
But they'll drift away
I watched the night turning into a day
Dark clouds are following you
But they'll drift away
I watched the night turning into a day
