Water is Blood

Catman Cohen

In the 21st Century, ALL major wars will be water wars.....Water is bloodDry red blood
On the lips of wild dogs
In the night
Suck the wounds of dead men
Thirst for lifeWater is blood
Dont let them steal our precious bloodWater is bloodA water elite is emerging: water for those who can afford it, NOT those who need it.....Greedy dogs
Buying up our water rights
Fight them off
Before the nation begs for
One last dropWater is blood
Dont let them steal our precious bloodWater is bloodWater use is growing at twice the rate of population growth.....Tattooed flesh
Shrivels in the coming drought
Wet pierced tongues
Sandy paper when the
Partys doneWater is blood
Dont let them steal our precious bloodWater is bloodBy 2025, two thirds of the world will be living in conditions of severe water shortage...Games must end
Another city going dry
Scream in rage
Or be around to watch the
Empire caveWater is blood
Dont let them steal our precious bloodWater is bloodScream in rage
Fight them off
Before the nation begs for
One last dropThirst for life
